

Creative Thinking

TELL ME – TELL ME MORE...*Amazing Animals A to Z*

Creative Thinking is the ability to think about things in a new, fresh way that involves originality and imagination. Instead of responding with memorized answers, answers are clever and unique. You can strengthen creative thinking skills by listening to and discussing answers to the questions at the bottom of each page. For added fun, students can write and illustrate some of their answers to make delightful mini-books!

Tell Me-Tell Me More Creative Thinking Discussion Questions:

Ants	What would it be like to have hundreds of brothers and sisters?
